## Helping Hubbub #DriveDownLitter

Roadside litter is not just unsightly. It harms wildlife, can cause road accidents and is dangerous and costly to remove. In fact, in the UK more than 200,000 sacks of rubbish are cleared from the motorways annually – costing a massive £6 million per year\*.

To help minimise this cost and reduce roadside littering, Hubbub have partnered up with Aecom, Highways England, Costa Express, Shell and Roadchef, as well as various Kent Resource Partnership councils, to launch their #DriveDownLitter campaign.

To increase awareness of the campaign and encourage customers to take the right action, Hubbub needed personalised outdoor litter bins to promote the #DriveDownLitter movement. We were proud to become part of this campaign by providing a selection of eye-catching Combo Delta™ Litter Bins.

With a large open aperture to encourage waste disposal, the Combo Delta Litter Bin is the ideal solution for litter collection in car parks, service stations and drive-through restaurants.

The funnel opening allows users to throw waste into the bin from the comfort of their vehicles, and the 'target' graphic within the aperture helps to encourage use and guide waste into the container.

We're extremely proud to be supporting Hubbub and their various partners with the launch of their #DriveDownLitter campaign to help reduce roadside littering across the U.K!

**For more information on how we can help you adapt your chosen outdoor litter bins for your organisation or campaign efforts, please contact us today!**

## Dog Waste Bins

To help keep pavements and open spaces clear of dog fouling, we produce a range of dog waste bins that are extremely strong and durable. Designed to be wall or post-mounted these dog waste bins are for outdoor use such as parks, public areas and leisure sites.

1

2

## How to Choose a Dog Waste Bin

The United Kingdom is home to a huge 9 million dogs, with up to 45% of households nationwide owning at least one pet\*. This amounts to a lot of daily walks, a great deal of barking, and unavoidably, a large amount of dog waste.

When looking for the right dog poo bin, there are several key things you should consider to ensure you select the best solution for your environment. We've created this go-to-guide featuring key qualities you should look for when choosing.

### 1. Well-designed and hygienic container

When choosing a dog waste container, it is essential to select a bin which has been designed with maximum hygiene in mind.

### 2. Robust construction from high-quality materials

Glasdon dog waste containers are constructed from corrosion and weather resistant materials, including Durapol® material and Duraplus™ material. All of our products including these pet waste bins undergo rigorous testing to ensure we supply only products of the highest quality.

### 3. Eye-catching graphics and colour options

Using recognisable signage and graphics can help approaching dog owners to distinguish between outdoor litter bins and dog waste bins.

### 4. Variety of fixing options

The way your chosen dog waste bin is displayed is a key factor when encouraging animal owners to clean up after their pets. The container should be easy to spot, whether it's sited in a park, on the beach, or any other dog-friendly location, and should be appropriately fixed to the available surroundings.

### 5. Extra amenities to supplement your dog waste bin

Provide passing dog owners with pet waste bins that feature a bag dispenser to allow them to scoop, bag and bin their animal's mess correctly in a dog poo bin.

## Indoor Recycling Bins

We design and manufacture a wide range of indoor recycling bins. Available in a large selection of styles, materials and capacities to suit your requirements. Apertures and graphics are available for various waste streams, which allow you to manage recycling waste more effectively.

- 1 Nexus® 100 Recycling Bin
- 2 Eco Nexus® Recycling Bin
- 3 Nexus® 50 Recycling Bin
- 4 Nexus® 30 Recycling Bin
- 5 C-Thru™ 10 Battery Recycling Bin

## Managing Confidential Documents and Confidential Waste Disposal

With regard to personal data, a key principle of the General Data Protection Regulation (GDPR) is that personal data is processed securely by means of 'appropriate technical and organisational measures'\*.

### Auditing Your Confidential Waste Disposal

Once the purposes of a confidential document have been fulfilled, the document becomes confidential waste.

The aim of this internal audit is to ensure that all physical confidential documents, in all areas of the organisation are disposed of securely with the appropriate technical measures in place to protect against unauthorised or unlawful processing and a data breach.

#### The audit should consider:

- Where confidential documents are created.
- The quantity of confidential documents created in any given period e.g. day, week and so on.
- Where and how confidential paper waste is currently disposed for collection before destruction.
- Who has access to your confidential waste once it is disposed?

### Selecting the Right Confidential Waste Bin

Performing an internal audit will help you identify the answers you need, such as the quantity and capacity of the bins you require.

#### Key considerations include:

Security, Style, Location

**For more information about Glasdon confidential waste containers or help with your confidential waste audit please talk to one of our specialist advisors today.**

# The What, Why and How To of On-the-Go Cup Recycling

Even when your main business activity isn't selling coffee, you can guarantee that disposable cups have been making their way into your offices and business premises!

**In fact, recent YouGov Plc figures revealed that 52% of consumers dispose of their coffee cup at work and that 88% of the nation would use a purpose-built cup recycling bin if one was available to them.**

Introducing cup recycling into the workplace has many benefits including cost savings on your landfill waste disposal.

If you've been confused about takeaway cup recycling, wondering if or how coffee cups can be recycled - you're definitely not alone.

We've compiled an eBook to help answer the BIG questions, along with insights into the latest industry developments and the consumer initiatives available right now.

The eBook is in three parts with links to each part throughout, so you can skip through to the parts that interest you the most.

Along with some smart infographics (feel free to re-use) in part 2 and 3, we've included a practical guide for workplaces which contains a list of the UK waste management companies providing cup recycling services.

So, whether you're a socially conscious coffee lover or a business that's trying to introduce a cup recycling programme we hope you'll find something recyclable to take away from us today.

Available to download from our website.

## Which materials do Glasdon use for their seats and benches?

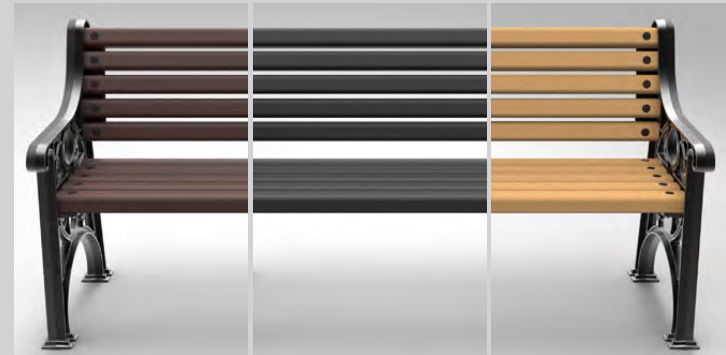

We aim to manufacture products of the highest possible standard using the best materials available – and our seating range is no exception. From the slats down to the seat ends, our benches are manufactured from specially selected materials that can stand up to heavy use and maintain a high quality throughout their product life.

**Armortec®** corrosion resistant coating is specially formulated to extend the life of Glasdon metal products and components used externally.

**Enviropol®** material is manufactured predominantly from post-consumer plastics. By balancing these uncontaminated recycled waste materials, the result is a remarkably versatile product with many applications and benefits. Enviropol will not chip or rust, is easy to clean and never needs painting.

**Timberpol®** material is a durable and strong composite material containing a minimum 70% recycled hardwood sawdust and recycled polypropylene. It is a remarkably versatile product with many benefits.

**Vandalex®** material is an aluminium alloy engineered to produce a high modulus of elasticity, which offers increased impact absorption properties. Its anodised finish will not rust, is easy to clean and never needs painting.

# Smoking Control

We're here to help you keep cigarette waste under control on your premises, with a wide range of quality, hard wearing smoking bins. The Glasdon collection offers everything from free standing ashtrays and cigarette bins to wall mounted ashtrays.

1

2

# How to Reduce Cigarette Butt Litter in the Workplace

Cigarette butts may be small, but they can have a big impact on the environment when they are incorrectly disposed of - even more so as they are reportedly the single most littered item according to a Keep Britain Tidy\* study.

By making some small changes to your workplace's environment, you can deter smokers from littering their cigarette butts, creating a cleaner and healthier environment for both your employees and community.

## 1. Create more opportunities

By choosing to supply accessible cigarette bins, you are providing smokers with the opportunity to dispose of their cigarette butts in a proper manner. Try focusing on the placement of smoking solutions at points where smokers are more likely to need disposal units such as entry and exits.

## 2. Educate your employees

Contrary to popular belief, cigarette butts are not biodegradable, so it is important to educate your employees about the impact of being careless with their cigarette waste. Provide positive signage to remind employees how they are helping the environment when they make the conscious decision not to litter.

## 3. Extend your efforts

Ensuring your cigarette bins are emptied frequently to maintain maximum hygiene, you can help to improve the cigarette littering rate at your business. Choose from litter and cigarette bin combos, wall mounted cigarette solutions, as well as outdoor litter bins enhanced with smoking control solutions such as stubber plates or aperture grilles to combat cigarette waste.

## 4. Designate specific areas for smokers

Designate particular areas in your workplace as smoking areas. This will enable you to collect cigarette butt litter in concentrated areas. By providing a comfortable environment with smoking bins, lighting and smoking shelters, your employees will feel more obligated to use them.

- 2 Cyclone™ Cycle Stand
- 3 Modus™ Cycle Locker

## Bollards & Posts

Our Bollards and Posts are available in a variety of traditional or modern styles and can be used for access control, verge protection and delineators to identify parking restrictions.

## What do I need to know about Glasdon Bollards?

From flexible, impact-absorbing bollards to sign-carrying and retroreflective marker posts, the Glasdon range of bollards features a variety of styles and sizes to suit traffic calming schemes for any road safety application.

### Flexible Bollards Self-Right After Impact

Self-righting, flexible bollards are an important feature within traffic calming schemes. Designed to withstand vehicle impacts before returning to their original shape, flexible bollards act as traffic guidance devices, to help mark out traffic routes and create vehicle buffers within parking lots and confined areas.

### Variety of Sign Face Options Guide the Way

To help keep vehicle drivers, pedestrians, bicyclists and other road users aware of safety precautions and regulations, we offer a wide selection of sign face options for our sign-carrier bollards.

### High-Quality Materials Drive Performance

We use a selection of rigorously tested, low maintenance materials in order to achieve optimal standards of performance to ensure an excellent service life.

### Retroreflective Properties Enhance Visibility

For increased visibility, be it day or night, many of our bollards feature retroreflective options. Retroreflective properties such as side reflectors and reflective banding enable the bollards to be seen when dark, by reflecting the light emitted from any surrounding sources including street lamps, car headlights and bicycle lights.

### Secure Fixings Keep Bollards Parked

To keep road safety bollards safely in place and provide a secure fixing, we offer surface mounted bolt-down fixings for all of our road safety bollards. Other fixing options are available.

**For more information about the Glasdon range of Bollards, or for help finding the right road safety solution for you, please browse our website or contact us today.**
