# Alturo™ Seats

FOR

## Bristol Airport

### Requirement Identified

After a review of their existing public seating outside the main terminal building, Bristol Airport decided to embark on a replacement programme.

The existing metal seats had become badly corroded over time, despite a total re-spray some four years ago and ongoing maintenance being undertaken. To compound this issue, the original supplier of the seats had ceased trading.

### Solution

Sam Goldsworthy, Operations Support Co-ordinator for Bristol Airport, was introduced to the wide range of seating products from Glasdon during a site visit by the local sales representative.

The customer was looking to provide a robust, economically priced metal seat, which was also aesthetically pleasing and inkeeping with the modern architecture of the terminal building.

After considering a number of options, Bristol Airport decided to purchase 14 seats with armrests from Glasdon's new Alturo range.

### Resulting Benefits

The Alturo seats have been well received and offer the customer the following benefits:

- **Contemporary appearance is ideal for modern surroundings.**
- **Durable design using modern materials, which offers low maintenance.**
- **Cost effective and robust seat.**
- **DDA compliant and can accommodate 3 to 4 people.**
- **Aerofoil shaped seat pan, which reduces the impact of fire damage and prevents water pooling.**
- **Armrests fitted to provide additional support for users.**

### What the customer says...

Mr Sam Goldsworthy, Operations Support Co-ordinator, commented:

**“The Alturo seats have proved to be successful for the Airport and are both durable and low maintenance, whilst complementing the modern aesthetics of the terminal building.”**

**As we have experienced on previous projects, Glasdon were again able to offer us a cost-effective solution with outstanding service and we would not hesitate to contact them for any future requirements.”**
