

Glasdon 'Beacon' Gatehouse

HONDA Honda Racing Development

Problem Identified

An existing site cabin did not fit in with the image Honda Racing Development wished to project for their company. As an image conscious organisation who are very much at the cutting edge of development in engine technology it was decided that the main entrance to their factory must be upgraded.

The Solution

Glasdon were contacted and after consultation and a site visit by our Regional Sales Manager, the Beacon range was selected as the most appropriate solution. Its high specification and modern aesthetics met all Honda Racing Development's needs and provided a functional and comfortable working environment for security staff.

Resulting Benefits

Honda Racing Development's new Beacon gatehouse has been a great success and the key benefits are as follows:

- High profile, smart focal point reflecting the company image.
- Comfortable working environment for the security staff because of high insulation levels and smart internal finishes.
- Attractive full width glazing which also ensures excellent visibility.
- Delivery direct to the site as a fully assembled, pre-finished unit, minimising disruption and 'down-time'.
- Low maintenance as a result of the use of modern materials, ensuring a long life span.
- Relocatable should site circumstances change in the future.

WHAT THE CUSTOMER SAYS:

Mr David Williams at Honda Racing Development was delighted with their choice of the Beacon system and had the following comments:

“The Beacon Gatehouse is a significant improvement on our previous site cabin and is excellently suited for its purpose. Our security staff are delighted with their new facility and are happy to have accommodation of this standard to work from. We found Glasdon to be a good company to work with and they provided a great product for the price, to the specification required.

As a focal point the gatehouse creates an excellent first impression for visitors and should the need arise in the future we would certainly use Glasdon and the Beacon range again.”
